About us

Kinco was founded in 1996, and successfully listed on the Shanghai Stock Exchange in 2020 (abbreviated name: Kinco share, stock code 688160), which is a high-tech, specialized and sophisticated enterprise that attaches great importance to independent research and development and innovation, mainly engaged in the research and development, production, sales and related technical services of industrial automation and robot core components and digital factory hardware and software. It is a leading supplier of automation control, robot power and digital factory solutions in China.

After years of continuous research and development and innovation, Kinco has established a complete product line with independent intellectual property rights, covering a series of products from machine IoT to human-machine interaction, control, drive and execution, which are widely used in robots, medical equipment, logistics equipment, packaging equipment, food equipment, clothing equipment, environmental protection equipment, etc. New energy equipment, rail transit equipment and other automation equipment industry.

Based on the comprehensive industrial automation and digital technology platform, the company has in-depth application scenarios in the robot industry, providing display, control, drive and other multi-dimensional solutions for industrial mobile robots, collaborative robots, industrial robots, pan-service robots, and bionic robots. Through the insight of the industry pain points, deep links with robot customers, combined with the advantages of product research and development, the company continues to innovate, and launches industry-leading low-voltage servo products for mobile robots, integrated servo wheel, frameless torque motor for collaborative robots, robot human-machine interfaces, robot controllers and other products. The company has formed a relatively complete robot core parts capability, and after nearly 10 years of hard work in the robot industry, it has become a leading enterprise in the field of mobile robot low-voltage servo, and has a high brand influence in the industry.

Kinco has four research and development centers in Shanghai, Shenzhen, Changzhou and Chengdu, and two manufacturing bases in Shenzhen and Changzhou, a total of 10+ domestic marketing centers, 100+ domestic service providers, 40+ global partners, and products are exported to 70+ countries overseas. In terms of after-sales service, Kinco has established after-sales service centers in Shanghai, Shenzhen and Changzhou.

Features of Kinco DToolsPro

FUTURE Series Second-generation F2070E2

- 7" display, 16.77M true color
- Quad-core CPU, 1G memory + 8G flash memory
- Three-proofing coating for PCB moisture, mildew and corrosion proofing
- Isolated power supply with strong anti-interference capability, safe and reliable
- Designed with dual Ethernet ports and three serial ports, support dual-RS485 applications
- With the latest configuration software Kinco DToolsPro

R321KB Series Desktop High-frequency Reader-writer

- Support USB port communication
- Built-in high frequency antenna
- Support ISO/IEC 14443A/B, ISO/IEC 15693 and ISO1 8000-3M1
- The effective reading/writing distance is up to 5cm (Source: Mifare1 S50 card in the environments free from other disturbances at room temperature)
- Built-in LED indicator and buzzer

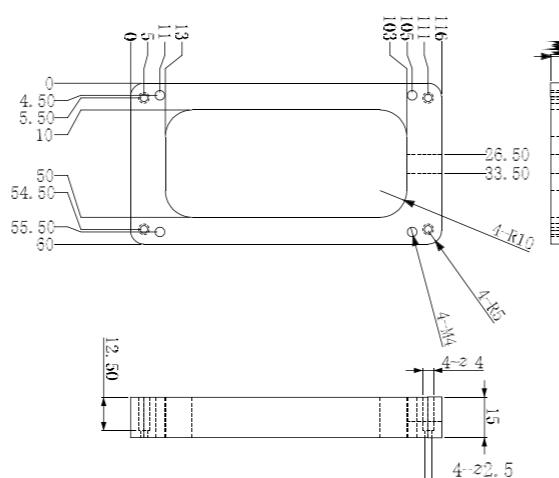

Model	RFID-R321KB-PB
Parameters	
Operating voltage/power consumption	+5V/0.3W
Communication port	USB
Port type	USB Type A
Operating frequency	13.56MHz
Antenna pattern	Integrated
TX power	0.2W
Supported protocols	ISO14443A/B,ISO15693/ISO18000-3M1
Tag reading distance	5cm
Operating temperature	-10°C~+65°C
Dimensions	122x73x15mm
Material	ABS

A new generation of Kinco configuration software:

Kinco DTools

The office software is of novel, simple and elegant style
The object-oriented development enables it to give quick response for maintenance and upgrade
The tag-variable configuration mode makes it close to the ST language programming habits
Integrated button, multiple copy, batch modification and other convenient operations boost efficient configuration
